Abstract (en)
[origin: EP0199230A2] To form this light fixture, two hollow bodies (11, 12) are provided which extend with their longitudinal axes parallel to one another and at a distance from one another and, on the one hand, are closed at their end faces and, on the other hand, are held at a distance from one another, by means of cover parts applied to the end faces. Between the two hollow bodies (11, 12), a reflector (38) is clamped. One of the two hollow bodies accommodates the batteries or accumulators (37) and the other one of the two hollow bodies (11) accommodates heat-generating components such as ballast (34) and the like. <IMAGE>
