Abstract (en)

[origin: EP0199830A1] 1. Process for producing a discontinuous recess (51), intended to be pierced by a suction tube (52), in a tubular, longitudinally glued or welded packing blank (50) in sheet-lined board for receptacles carrying liquids, characterised in that the blank (50) is supported (5) inflexibly at the intended point in the interior of the tube and then the recess is cut out of the supported point in the blank wall as a solid cylinder.
