Abstract (en)
[origin: ES296601U] A manhole for an urban sanitary system comprises a cover 2, a frame 1 for receiving the cover, a toric elastomeric sealing ring G1 interposed between the frame and the cover, and a soundproofing ring G2 on which the cover seats. The locking of the cover on the frame and the support of the cover on the rings G1 and G2 are implemented by a plurality of flanges 4 recessed in the frame and bolted thereto.
