Abstract (en)

[origin: US4780375A] A bismuth activated alkali metal halide phosphor having the formula (I): $M_1X:xBi$ (I) in which M_1 is at least one alkali metal selected from the group consisting of Rb and Cs; X is at least one halogen selected from the group consisting of Cl, Br and I; and x is a number satisfying the condition of $0 < x \leq 0.2$. A process for the preparation of said phosphor, a radiation image recording and reproducing method utilizing said phosphor, and a radiation image storage panel employing said phosphor are also disclosed.
