Abstract (en)

[origin: EP0200112A2] 1. A swimming bath installation, particularly an indoor bath installation, with a normal swimming pool (1) with water at a first temperature and the provision, in addition to the normal swimming pool (1), of a warm water pool (2), particularly a warm bubble pool, with water at a second temperature higher than the first temperature, a circulation installation (3) to convey the water from the swimming pool (1) in a water circulation path for filtration and sterilization (9) and a heater (13) to heat the water supplied to the warm water pool, in which the water conveyed to the warm water pool (2) is withdrawn from the water circulation of the swimming pool (1) and if desired the water withdrawn from the warm water pool (2) is passed back again into the water circulation of the swimming pool, characterized in that a heat exchanger (17) is provided with a low temperature path (18) and a high temperature path (19) in heat-exchanging reciprocal action therewith and that the water flowing into the warm water pool (2) passes through the low temperature path (18) and the water flowing out of the warm water pool (2) passes through the high temperature path (19) of the heat exchanger (17).
