Abstract (en)
A wall cladding assembly has one or more panels (12, 13, 14; 233) and means for supporting the panels on a wall. The support means include a single, elongate, load bearing support beam (10) for securement to a wall horizontally and the beam (10) supports and provides a reference position for location of the panels (12, 13, 14; 233). The support means further comprise at least two elongate members (16, 17; 230) associated with and supporting the or each panel, the elongate members being adapted to be hung vertically from the beam (10). The elongate members (16, 17; 230) are held against the wall.
