Abstract (en)

[origin: US4741272A] A disconnectable locking clamp disconnectable from an overhead cable onto which it is locked, the clamp having a body with a fixed jaw and a movable jaw and in which the support surface (11) of the fixed jaw (3) has, on the one hand, a first cylindrical surface (14) complementary to a corresponding surface (15) of the cable, and, on the other hand, the end (6) of the fixed jaw (3) has a second surface (16) which is an extension of the first surface (14) and which is spaced from a corresponding surface (17) of the cable. The invention also covers methods of disconnection, connection, and uncoupling of such a clamp, and a transport or towing installation using such a clamp.
