Abstract (en)  
[origin: EP0201049A1] The pneumatic single-grain seeder has a blower and a fertiliser storage container which is arranged in front of the seeding units of the seeder. In order in the simplest possible way to provide an advantageous arrangement of the blower of a single-grain seeder in combination with a fertiliser spreader, an advantageous development of the fertiliser storage container being achieved at the same time, the fertiliser storage containers are combined to form a continuous container (7), the blower (8) is arranged behind the continuous container (7), and the blower (8) is driven via a backgear (20). <IMAGE>
