Abstract (en)  
[origin: EP0201427A2] A toll-collecting device (10) is provided with a removable, lockable cash box (14). The cash box (14) has an access hole for collecting coins which opens as the box (14) is inserted into the device, and closes after the box (14) has been removed. After the box (14) has been removed its access hole cannot be re-opened until its door mechanism is reset.
