Abstract (en)  
[origin: EP0202971A1] 1. A bituminous sealing sheet for making waterproof revetments with an upper asphaltic layer capable of being used under hot asphalt without the occurrence of any migration of its constituents within this latter and comprising a bituminous composition, characterised in that it meets at least two of the following criteria : a) the bituminous composition has a drop point higher than 120 degrees C ; b) the bituminous composition has a density higher than 1.35 ; c) provision is made for a screen slightly permeable to the bitumen on the face of the sheet intended to be oriented towards the upper layer of the revetment.
