Abstract (en)
[origin: DE3508777A1] A venting valve for storage and/or transport containers, in particular for dangerous liquids, has a basic body (1) in which a venting aperture (5) is formed which is surrounded on the outlet side by at least one annular rib (3). Braced against the rib (3) or ribs counter to the outlet direction is a plate spring (2) which, with a closed surface (15), covers at least the region enclosed by the rib (3) or the ribs. <IMAGE>

Abstract (fr)
Bière faiblement alcoolisée ou non alcoolisée, à teneur comprise entre 0,3% et 2,0% en volume de glycérine pour lui donner plus de corps. La bière est produite par fermentation de moût suivie, le cas échéant, de retrait d'alcool. Pour lui donner plus de corps, on ajuste la teneur en glycérine de la bière par une fermentation dans des conditions conduisant à une augmentation de la production de glycérine et/ou par l'addition de glycérine ou d'un liquide contenant de la glycérine.
