Abstract (en)
An automatic labelling apparatus comprising (A) a pay-off section (13) for delivering a label-holding sheet (12) having labels (11) provisionally attached strippably to its surface, said labels containing pressure-sensitive microcapsules (4) and having the function of handling time and temperature upon rupture of the micro-capsules, (B) a first guide means (17) for guiding said sheet, (C) a pressure applying means (31, 32) for applying pressure to both surfaces of said sheet (12) guided by the first guide means (17) in order to rupture the micro-capsules in the labels, (D) a stripping means (18, 18a) for stripping the labels from said sheet, (E) a label applicator means (14) for applying each of the labels to an object (P), (F) a second guide means (22) for guiding said sheet stripped on the labels (12'), and (G) a wind-up section (21) for winding up said sheet guided by the second guide means (22).
