Abstract (en)

A cylindrical shell (1) surrounds a longitudinal inner hollow space (2). The shell (1) comprises two coaxial walls (4, 6) made of plastic material reinforced with longitudinal fibres. The two walls are joined by a low-density felt (7). Use for producing a lightweight mast having good resistance to buckling. <IMAGE>

Abstract (fr)

Une coque (1) cylindrique entoure un espace longitudinal interne creux (2). La coque (1) comprend deux parois coaxiales (4, 6) en matière plastique renforcée de fibres longitudinales. Les deux parois sont réunies par un feutre à faible densité (7). Utilisation pour réaliser un poteau léger ayant une bonne résistance au flambement.
