Abstract (en)
[origin: WO8603881A1] Bitter magnet having an improved field homogeneity. According to the invention, the tie-rods (119) of the pile of discs (113) are used to bring back the current to one of the axial ends of the magnet without generating a parasite field. Application to MNR imaging.

Abstract (fr)
Aimant de Bitter à homogénéité de champ améliorée. Selon l'invention, on utilise les tirants (119) de l'empilement de disques (113) pour ramener le courant vers l'une des extrémités axiales de l'aimant sans créer de champ parasite. Application à l'imagerie par RMN.
