Abstract (en)
[origin: WO8603722A1] A pleasure boat structure comprises an oblong central body (1), two floats (2, 3), two lateral longitudinal arms (4, 5) a first end of which is secured to said body and two other ends are associated respectively with said two floats (2, 3). This structure is characterized in that said body (1) is comprised of a beam (20) consisting of two parts (21, 22) which are butted to each other at a junction surface (23), the relatively short part (21) substantially configured as a circle of an arc having a first curvature radius value, the longer part (22) substantially configured as an arc of a circle having a second curvature radius value considerably higher than the first value.
