Abstract (en)
[origin: EP0204947A2] Baseplate (10) made of plastic for the production of floor coverings of high load-bearing capacity. The baseplate (10) consists of a plate (12) essentially flat on the top side. From the underside of the plate (12) project two groups of intersecting rows of integrally formed-on parallel supporting and stiffening webs (20; 22) which are interrupted at regular or irregular intervals over their entire web height.
