Abstract (en)
[origin: ES8801849A1] Fabrics of wool and silk are gently washed with a liquid detergent which is free of inorganic builder salts and optical brighteners, has a pH value of from about 6 and about 8, and contains the following constituents: (a) from about 5 to about 15% by weight of the alkylglycoether sulfate sodium salt of primary C12-C18 alcohols containing on average from 1 to 3 ethylene glycol ether groups (b) from about 15 to about 22% by weight of sodium alkylbenzene sulfonate having a linear C10-C14 alkyl chain (c) from about 0.5 to about 5% by weight of fatty acid monoethanolamide of C12-C18 fatty acids, of which the content of saturated C12-C14 fatty acids amounts to at least about 50 mole percent (d) from about 0.05 to about 0.5% by weight of an emulsified silicone defoaming agent (e) from about 0 to about 5% by weight of non-surface-active detergent additives and (f) the remainder being water wherein the total quantity of components (a)+(b) amounts to between about 20 and about 30% by weight, and the ratio by weight of components (a)+(b) to component (c) is between about 3:1 and about 25:1.
