Abstract (en)

[origin: ES294811U] This buckle, which is intended in particular for the safety belt of a motor vehicle, has a housing (1) inside which there is located a body (4) intended to be fixed to a retaining means integral with the vehicle, a locking member (5) intended to keep the latch in a locked position, and a lock release member (6). The locking member (5) is mounted inside the said body (4) so as to oscillate and be displaceable between a position where the said latch is locked and a position where the latter is released and has at its ends means intended to co-operate with stopping surfaces of the body (4) and of the latch via the action of a destabilizing device (16).

Abstract (fr)

Cette boucle notamment de ceinture de sécurité pour véhicule automobile comporte un boîtier (1) dans lequel est placé un corps (4) destiné à être fixé à un moyen de retenue solidaire du véhicule, un organe de verrouillage (5) destiné à maintenir le pêne en position verrouillée en un organe de commande de déverrouillage (6). L'organe de verrouillage (5) est monté oscillant et déplaçable à coulissement dans ledit corps (4) entre une position de verrouillage dudit pêne et une position de libération de celui-ci et il comporte à ses extrémités des moyens destinés à coopérer avec des surfaces d'arrêt du corps (4) et du pêne sous l'action d'un dispositif à franchissement de point mort (16).
