Abstract (en)

[origin: EP0206908A1] 1. An automobile headlamp of the kind comprising at least one reflector (10; 20; 30a - 30b - 34a; 40 - 50) cooperating with a single light source (11; 23; 33; 42), a screen (15; 25; 36; 45) containing liquid crystals of variable transparency, interposed in the path of the light rays, characterised in that the screen comprises at least one masking zone (Z) to which the liquid crystals give either a state of transparency or a state of non-transparency, and in that the said zone (Z) has a limit which defines a cut-off limit for the light beam emitted by the headlamp.
