Abstract (en)

[origin: EP0207059A1] 1. Closing device for files with at least two fixed pins (2) attached to a base panel (1) and also to two movable pins (3) which move into an open position by means of a pivotal rod (6) from a closed position in which the free ends of movable pins (3) rest on the free ends of the fixed pins, for the purpose of forming a closed guide for perforated sheets, in the open position of which the free ends of the movable pins (3) are raised from those of the fixed pins (2), characterized in that by operating the pivotal rod (6) the free ends of the movable pins (3) are raised sufficiently far from the free ends of the fixed pins (2) that the pivotal rod (6) can be pivoted between the free ends of both sorts of pins into an end position in which it is possible easily to insert and turn over perforated sheets.
