Abstract (en)
[origin: WO8603953A1] The hair-curler is comprised of two parts capable of being assembled, a first part having a socket (20) and a plurality of rectilinear or curved cylindrical pins (21, 22, 23) and having a pointed end and a second part comprising a socket (30) provided with holes (31, 32, 33) for the points and pins (27, 28, 29) intended to be alternately arranged with the pins of the first part. The pins (27, 28, 29) are either fixed to the socket (30) or removable and individually mounted on said socket, slots (34, 35, 36) being then provided.
