Abstract (en)

[origin: US4744125A] A door closer is described in which transmission characteristics which change in dependence on the closing angle can be realized either by two pistons disposed coaxially within one another and displaceable relative to one another, or by eccentric toothed elements.

Abstract (de)

Es wird ein Türschließer beschrieben, bei dem entweder mittels zweier koaxial ineinander und relativ zueinander verschiebbaren Kolben oder mittels exzentrischer Zahnelemente sich in Abhängigkeit vom Schließwinkel ändernde Übersetzungsfunktionen realisiert werden.
