Abstract (en)  
[origin: EP0207419A2] On the underside of the tool box (1) are arranged legs (50, 51), the upper ends of which are mounted displaceably in the longitudinal direction of the box and pivotably about transverse axes. The legs (50, 51) are connected to guide links (70, 71) which are articulated pivotably about transverse axes near the box end faces and in a middle region of the legs (50, 51). The legs can be swung out of the position shown into a transport position, in which the legs (50, 51) and the guide links (70, 71) rest on the box underside. <IMAGE>
