Abstract (en)

[origin: EP0207902A2] The present invention relates to a closet bowl, provided with means for washing the body of the user, which comprises a bowl body (2) including, in its inside, a cavity to be coupled to a discharging duct. The main feature of the invention is that it comprises washing nozzles (5) leading to the cavity and which can be controlled to deliver washing jets to the part of the user's body to be washed, with water having a preset temperature.
