Abstract (en)
[origin: EP0207925A2] 1. A gallery-driving machine having a mobile carriage (1) with a pressure-medium supply and a slide track (6) for a drilling arm (10) having a drill mounting (13), and also having a drilling motor, in particular a percussion drilling motor and advancing motor, intended in particular for an arm, for example a cutting arm (4), which is rotatable about a vertical axis (b) on a pivot member (3) mounted on the carriage (1) and which is mounted for upward and downward movement on the pivot member (3), characterised in that the slide track (6) along which the drilling arm (10) is movable in the driving direction (a) is mounted on the pivot member (3) so as to be laterally pivotable and at its rear end (17) is supportably and locatably mounted on the carriage (1) via a support (7).
