Abstract (en)
[origin: EP0208237A1] The combination (1) is constituted by a sliding window pane (2) for a motor vehicle door and a carrier (3) for connecting the window pane (2) to a corresponding drive device. The window pane (2) comprises a through bore (6), and the carrier (3) comprises at least one peg (7) cooperating with said bore (6), and connection means (8) for enabling said carrier (3) to be fixed to a suitable mobile member of said drive device.
