Abstract (en)
[origin: ES8706493A1] The invention relates to a core or shell bundling machine for the fully automatic assembly of bundles of cores or shells in foundry work, and consists of a removal apparatus for the cores/shells, a pivot apparatus, an adhesive application system, a bundling apparatus and an immersion device. By means of the machine described in the invention, the cores/shells coming from a core and shell shooting machine are immediately combined or bundled in accordance with the cycle time of a machine of this type.
