Abstract (en)

[origin: EP0209845A2] In a mounting for doors or the like made completely of glass, consisting of two parts which grip the glass leaf between them and which generate and secure the grip of the glass leaf outside the region surrounding the glass pane, on their mutually opposite sides, by means of faces inclined relative to the horizontal and in conjunction with an adjusting element, the two parts (20, 21 or 30a, 30b) are pivotable or have a pivoting connection about a common longitudinal axis outside the region surrounding the glass leaf (11). <IMAGE>
