Abstract (en)

[origin: EP0210944A2] 1. A process for the horizontal continuous casting of metals, in particular of steel, in which the cast billet is produced step-wise from an oscillating horizontal continuous casting mould, characterised in that in addition to the backward and forward movement of the horizontal continuous casting mould the cast billet is conveyed in the direction of movement of the billet in steps in such a manner that the movements of the horizontal continuous casting mould and the billet drawing machine in the direction of movement of the billet take place synchronously at the same speed.
