Abstract (en)
[origin: EP0211390A1] 1. Rebound wall for tennis training using an inflatable air chamber, characterized in that the air chamber forming the rebound element consists of a one-piece, low-damping rectangular sheet (3) of a spaced fabric coated with rubber and filled with air at an over-pressure of 0.5-1.5 bar, the two external fabric lengths (5, 6) of which are held at constant separation by pile threads (7) extending perpendicular thereto and are joined air-tight to one another at the peripheral edge (8).
