Abstract (en)  
[origin: EP0211463A1] 1. A laundry-washing machine comprising a container for a detergent in powder or liquid form, which container is arranged at the top of a tub and comprises a water inlet, a siphon and overflow discharge means for diluted detergents, said container being provided with a double wall to form an internal space having at least a double bottom (9) with horizontal walls and with at least a lateral space (8) having vertical walls, characterized in that said internal space is a space bounded by the double wall and comprising only the following passages : said water inlet which opens (10, 11) exclusively into said internal space, at least one hole (12) in the form a slit in the inner wall (6) of the double botton, allowing the water to pass from the internal space (8, 9) towards the container and giving the jet an orientation parallel to the tangent plane to said wall, said siphon which opens directly into the tub.
