Abstract (en)

[origin: US4736425A] The invention relates to fiduciary documents and liquids requiring an authentication and a method of marking. The authentication is effected by producing a synthesis reaction of a fluorescent chelate in or on the materials to be authenticated.

Abstract (fr)

L'invention concerne des documents fiduciaires et des liquides requérant une authentification et un procédé de marquage. L'authentification est réalisée en effectuant une réaction de synthèse d'un chélate fluorescent dans ou sur les matières à authentifier.
