Abstract (en)
[origin: US4734210A] The invention relates to lubricant compositions comprising at least one compound of the general formula I <IMAGE> (I) wherein R1 and R2 are independently alkyl, alkenyl, cycloalkyl, aryl or aralkyl; or R1 and R2 together with the nitrogen atom to which they are attached form a heterocyclic ring. The N,N-disubstituted S-thiiranylmethylcarbamoethioates of formula I are particularly suitable for use as antiwear additives and extreme pressure additives for mineral and synthetic lubricants.
