Abstract (en)
The bag is composed by two terminal bag members (1,1') provided each with a side panel (101,101') and with a handle (2,2'), and further provided along their peripheral rim with complementary slide fasteners (3,3') one of which is provided with a slider (4). Intermediate bag members (5,5',10) are provided each formed by a tubular band-like element (105,105',110) closed at one side by an end panel (205, 205') and provided along their peripheral rims at their opposite sides with complementary slide fasteners (6,6'; 11,11'; 7,7') and with sliders (8, 9, 12) for releasably securing them together and to the said terminal bag members (1,1'). At least one of the said intermediate bag members is provided with means (13,13') for securing a shoulder strap (14).
