Abstract (en)
[origin: EP0212561A2] The infusion bag consists of a liquid-permeable, sealable material, in particular paper fabric, to which a holding string is attached, the top side being open and formed by a seamed edge, through which either the holding string is threaded or along which it is stitched and the ends of the holding string serving as pulling string are guided out at adjacent portions of the edge at a lateral edge of the bag. <IMAGE>
