Abstract (en)

[origin: US4774738A] The glass plate washing machine has a horizontal conveyor which comprises glass-plate supporting elements, which define a glass-plate travel plane, to support the glass plates over one of their two large faces during passage through the washing machine. Disposed at each side of the glass-plate travel plane are two sets of brush rollers which are driven and the axes of which extend transversely to the direction of travel of the horizontal conveyor, the spacing between the two sets of the brush rollers, which are mounted in front of and in back of the glass-plate travel plane, from the glass-plate travel plane, being variable, wherein one set of brush rollers is movable with respect to the other set of brushes to accommodate different thicknesses of glass-plate. The brush rollers in said movable set are adjustable individually and are driven individually.

Abstract (de)

Die Glastafelwaschmaschine hat einen Waagerechtförderer (1, 1a, 4), welcher zum Abstützen der Glastafeln (5) über eine ihrer beiden Grossflächen beim Durchlauf durch die Waschmaschine Stützelemente (2a) hat, die eine Glastafellaufebene (6) definieren. Beidseits der Glastafellaufebene (6) sind antreibbare Bürstwalzen (8-11, 8a-11a) angeordnet, deren Achsen quer zur Laufrichtung (7) des Waagerechtförderers verlaufen, wobei der Abstand der Bürstwalzen, welche vor bzw. oberhalb der Glastafellaufebene (6) gelagert sind, von der Glastafellaufebene veränderbar ist. Die in veränderbarem Abstand zur Glastafellaufebene (6) angeordneten Bürstwalzen (8, 9, 10, 11) sind einzeln verstellbar und einzeln antreibbar.
