Abstract (en)
[origin: EP0212664A2] 1. Cover piece for the pivoting handbrake lever of a motor vehicle, where the handbrake lever extends through a slot in a console mounted on the floor of the vehicle and is pivoted on a pivot pin located below or behind the surface of the console, characterised in that the cover piece (10) extends along the complete length of the slot (2) and is U-shaped in section to accommodate the handbrake lever (3), the sides (11, 12) of the cover piece are of suitable shape and size so that they also extend into the slot in the console when the handbrake is applied, and that the cover piece is pivoted near its rear end in the console (1) above the pivot pin (5) of the handbrake (3) and close to the upper surface of the console (4).
