Abstract (en)

[origin: EP0212996A2] Set of elements for the arrangement of exhibition halls, shops, etc. comprising vertical panels provided with horizontal grooves capable of receiving hooks for fixing various equipment accessories. Each of these panels consists of an actual panel (1), on the front face of which are fixed, horizontally, one on top of the other, profiles (3), made from metal or another suitable material, with, between them, a gap forming one of the grooves (5) of the corresponding panel. In point of fact, each of these profiles forms, simultaneously, on the front, a vertical slideway (7) capable of receiving a decorative plate (8), and, at the rear, on each of its horizontal edges, a recess forming a channel (10) which is open in the corresponding groove (5). Thus, the cross-section of each of the grooves of the panel has a general T-shape enabling it to receive a bent hook (25) for fixing an equipment accessory, for example a shelf (23). The grooved panels and other elements of the present set can be used for the arrangement of exhibition halls, shops and other venues. <IMAGE>
