Abstract (en)

[origin: EP0213065A2] Electromagnetic relay having a base plate carrying electrical terminal elements, a yoke aligned parallel to this base plate and a removable covering cap having at least two mutually opposite inner surfaces aligned essentially parallel to one another, the base plate being of U-shaped design and having side walls which nestle closely from the inside against the inner surfaces of the covering cap and cut-outs at the height of the yoke being provided in the side walls, through which pass web-like projections which form extensions of the yoke and whose ends extend to the inner surfaces of the housing cap. <IMAGE>
