Abstract (en)
[origin: WO8505573A1] To create such a system, it is proposed that the metal sections (9) are held, with the insertion of masking covers (10), parallel to one another on a frame (2) in such a way that the masking covers (10) lie against the opposite adjacent metal sections (9) and form with these a closed wall. This wall makes it possible to apply a powder coating of a different colour to the surfaces of the sections situated on both sides of the wall.
