Abstract (en)

[origin: EP0213312A2] 1. Arrangement for the connection of sleeve (1) or pin contacts (13) with lead wires (10) arranged in sleeve (9) or connector shells by means of studs (3) cast in one piece with strip parts (2) arranged at the sleeve (1) or pin contacts (13), which can be bent for being pressed against the lead wires. The strip parts (2) can be bent with the part showing the studs (3) across the longitudinal axis of the sleeve (1) or pin contact (13) and between two tabs (11) cast in one piece with the sleeve or pin contact. The arrangement is characterized in the way that the studs (3) can be put against the backward face (1', 13") of the sleeve (1) or pin contact (13) by means of the strip part and in the way that the bent strip part (2) can be lapped over by the tabs (11).
