Abstract (en)

[origin: EP0213439A2] To the discharge chain jib is associated a control console contg. remote control appts. A sheet support is provided to allow quality control of printed sheets during the machine operation. The control console (3) is associated with the chain jib (1) to allow extraction of samples. It is situated, together with the support (10), directly at the end of jib. The support forms an extension of the chain jib below the transport track for the sheets and the sample outlet.
