Abstract (en)

[origin: EP0214006A1] 1. A skin stimulation apparatus, comprising a handle (1) and a roll (2) mounted on a central spindle (3) adapted on said handle, said roll consisting of a sleeve in supple material, surrounding said central spindle, bristled up radially with tentacles, on the end of which are provided spheres (5), characterized in that said handle (1) is arranged in such a manner that its bent-in ends (6) oppose a slight resistance to the free rotation of said roll (2).
