Abstract (en)  
[origin: US4776461A] In (cigarette) packs, sealing and consequently aroma and moisture preservation are unsatisfactory, particularly because of a lack of sealing of an inner wrapping (tin foil blank 13). With the external appearance and constructive design of a (soft-cup) pack being maintained, the inner wrapping is sealed off by means of bonding strips in specific regions of the overlap or fold. Of particular importance here is a bonding strip (23) in the region of a continuous longitudinal overlap 20 which ensures a considerable increase in leak-proofing.
