Abstract (en)
[origin: EP0214510A2] A laundry washing machine comprising a laundering tub (4) and a circular hoop (10) made of a plastic material and adapted to be removably secured to the tub (4) in intimate engagement with the outer periphery thereof. In particular, the hoop is integrally formed with a number of brackets (14, 15) and a pair of lugs (16, 17) as well as with a pressure-sensing dome (18) for the connection thereto of a pressure switch. In this manner, the tub (4) can be mounted within the housing (7) of the machine by suspension springs (8) engaging respective brackets (14) from above, and vibration dampener elements (9) hingedly connected to respective brackets (15). The tub may additionally carry the motor (21) for rotating the drum (5) by the connection of the motor to the pair of lugs (16, 17).
