Abstract (en)
[origin: EP0214516A2] The furniture has a seat (1) which can be placed directly on the floor and is arranged so as to be swivellable on a frame. The frame has a support part (2) which can be placed on the floor and a backrest part (3) which is arranged at a fixed angle to the support part. The support part and backrest part are each formed from a U-shaped tubular element and are connected to one another on their free limbs via in each case an L-shaped plug-in connection element (4, 5). The latter can be swivelled inwards around the limbs of the support part (2). The frame is provided with a cover (6), to which the seat (1) is attached in the region of the connection elements (4, 5). The frame can be folded up without the cover having to be removed. After dismantling, the cover can be folded up, the parts of the frame remaining in the cover. In the folded up state, a compact package of small dimensions is obtained which is easy to carry and can easily be stored. <IMAGE>
