Abstract (en)
[origin: EP0214587A1] The device (1) comprises a frame (3) supporting a plurality of rollers (4), arranged parallel to each other, freely rotating, and being adapted for tensioning and entraining a plurality of flexible panels (2), bearing subject matter to be displayed. The panels (2) are joined to each other in a closed-loop formation, and attached to traction elements adapted for movement along guides located at opposite faces of the frame (3), elements (8) for illuminating and elements (14,15) for adjusting the tension of the closed-loop formation of panels.
