Abstract (en)
[origin: EP0214650A2] 1. A building block comprising a base member provided with air cavities, wherein first webs (2) are formed integrally with at least one side of the base member (1), which extend over only a part of the height of the base member (1) and have formed integrally therewith a first skin (3) parallel to the base member (1) and wherein the space between the skins (3, 5) and/or between the base member (1) and the skin (3, 5) is filled with insulating material, characterised in that second webs (4) are formed integrally with the first skin (3) and/or with the other side of the base member (1), and have formed integrally therewith a second skin (5) also parallel to the base member, which webs also extend over only a part of the height of the base member (1) and indeed are vertically offset with respect to the first webs (2).
