Abstract (en)
[origin: WO8605151A1] A windscreen wiper installation in which a magnet is used in order to relieve the load on the wiper blade in the parked position. The force of the magnet counteracts, without any contact, the pressure which is created in the well-known manner, for example by a tension spring between the attachment part and articulated part of the wiper arm.

Abstract (fr)
Installation d'essuie-glace, où un aimant agit pour le délestage de la lame de balayage dans la position de repos de l'essuie-glace; la force de l'aimant s'oppose sans contact à la force de pression, qui est produite de la manière connue, notamment par un ressort de tension entre la pièce de fixation et la pièce articulée du bras de balayage.
