Abstract (en)
[origin: EP0215202A1] 1. A method of producing a closure cap from synthetic plastics material and intended for bottle-like containers, in particular a screw cap, in which there is disposed a sealing washer which is held captively secured by projections, characterised in that the sealing washer is inserted into the interior of a wall ring which projects slightly beyond the adjacent part of the inner wall of the container, the free bottom edge of the wall ring being deformed by a die-like tool to form protruding projections.
